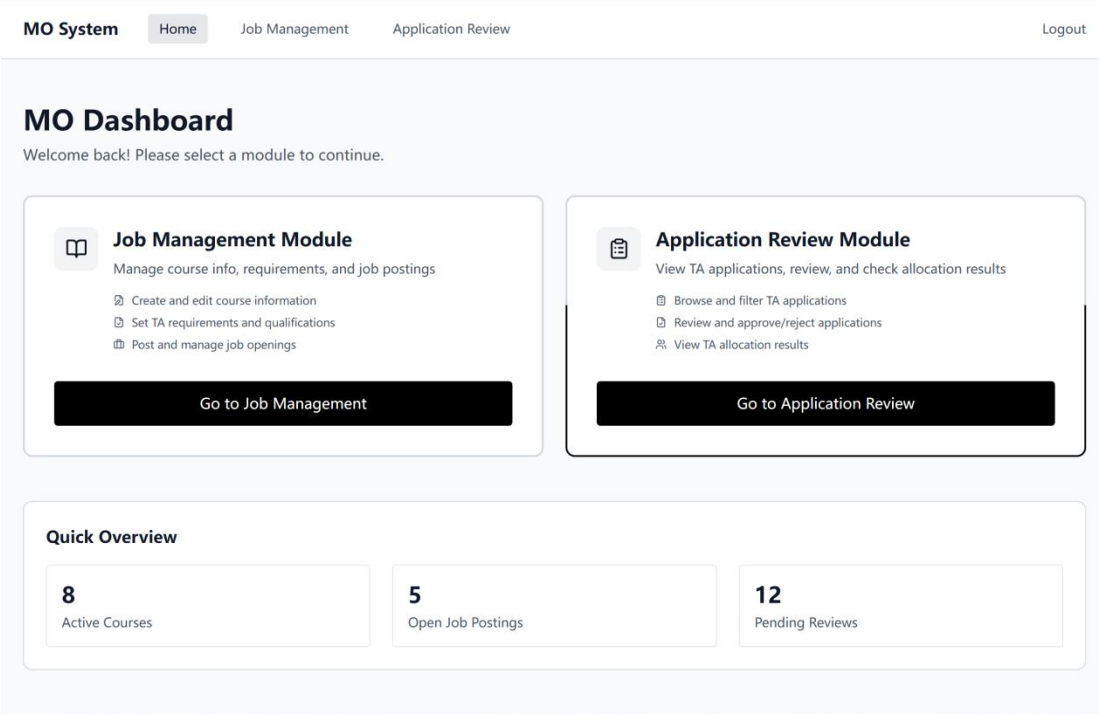
Application Review Module

This system is an assistant recruitment management platform designed for Module Organizers (MO), featuring two core modules: Course Management and Application Review. It supports end-to-end operations including course information maintenance, TA position postings, application review, and result tracking. With a mid-fidelity web interface design, the platform offers intuitive and user-friendly operations, facilitating modular development and team collaboration.

1.MO Dashboard



The homepage is the default page after login, featuring core functions such as module entry navigation and data overview. The module entry includes Job Management module and Application Review module.

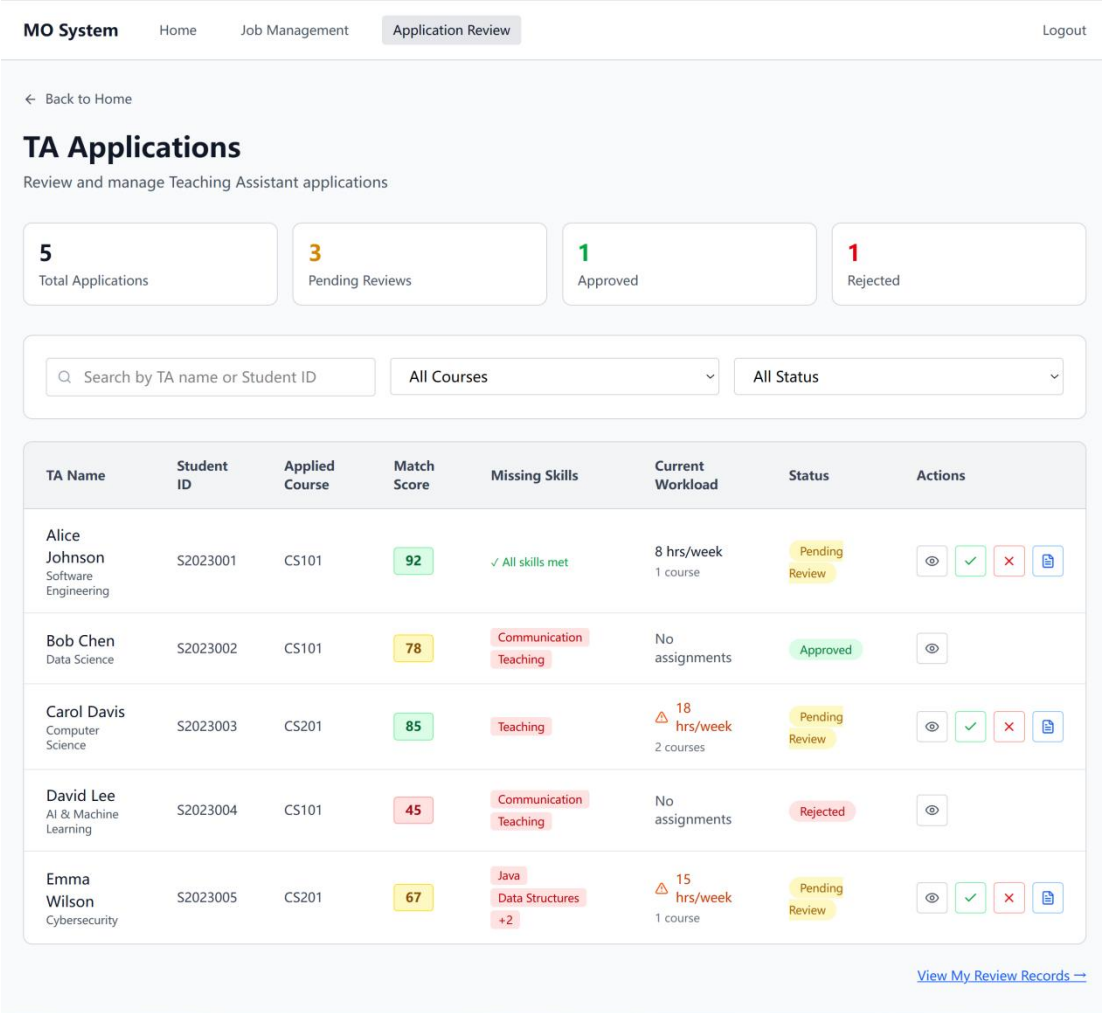
（1）Job Management Module: Manage course information, TA requirements, and job postings. Click "Go to Job Management" to access it.

（2） Application Review module: Browse TA applications, complete reviews, and view assignment results. Click "Go to Application Review" to enter.

（3）Quick Overview: Active Courses, Open Job Postings, Pending Reviews.

When you first log in, you can quickly assess your workload through these overview metrics before selecting relevant modules to begin your tasks.

2. TA Applications



Clicking "Go to Application Review" will take you to the TA Applications page, which offers core features including browsing, filtering, and fast processing of TA applications.

（1）Data statistics: displays the total number of applications, pending approvals, approved approvals, and rejected approvals.

（2）Screening and Search: Supports searching by TA name/student ID; searching by course; filtering by application status (All/Under Review/Approved/Rejected).

（3）The application list includes the following details:

• TA Name, Student ID, Applied Courses;

• Match Score: Displays a skill matching score ranging from 1 to 100, coded with different colors (green ≥ 80, yellow ≥ 60, red < 60);

• Missing Skills: Highlights key skills lacking by applicants using red labels, "✓ All skills met" in green if all requirements are satisfied;

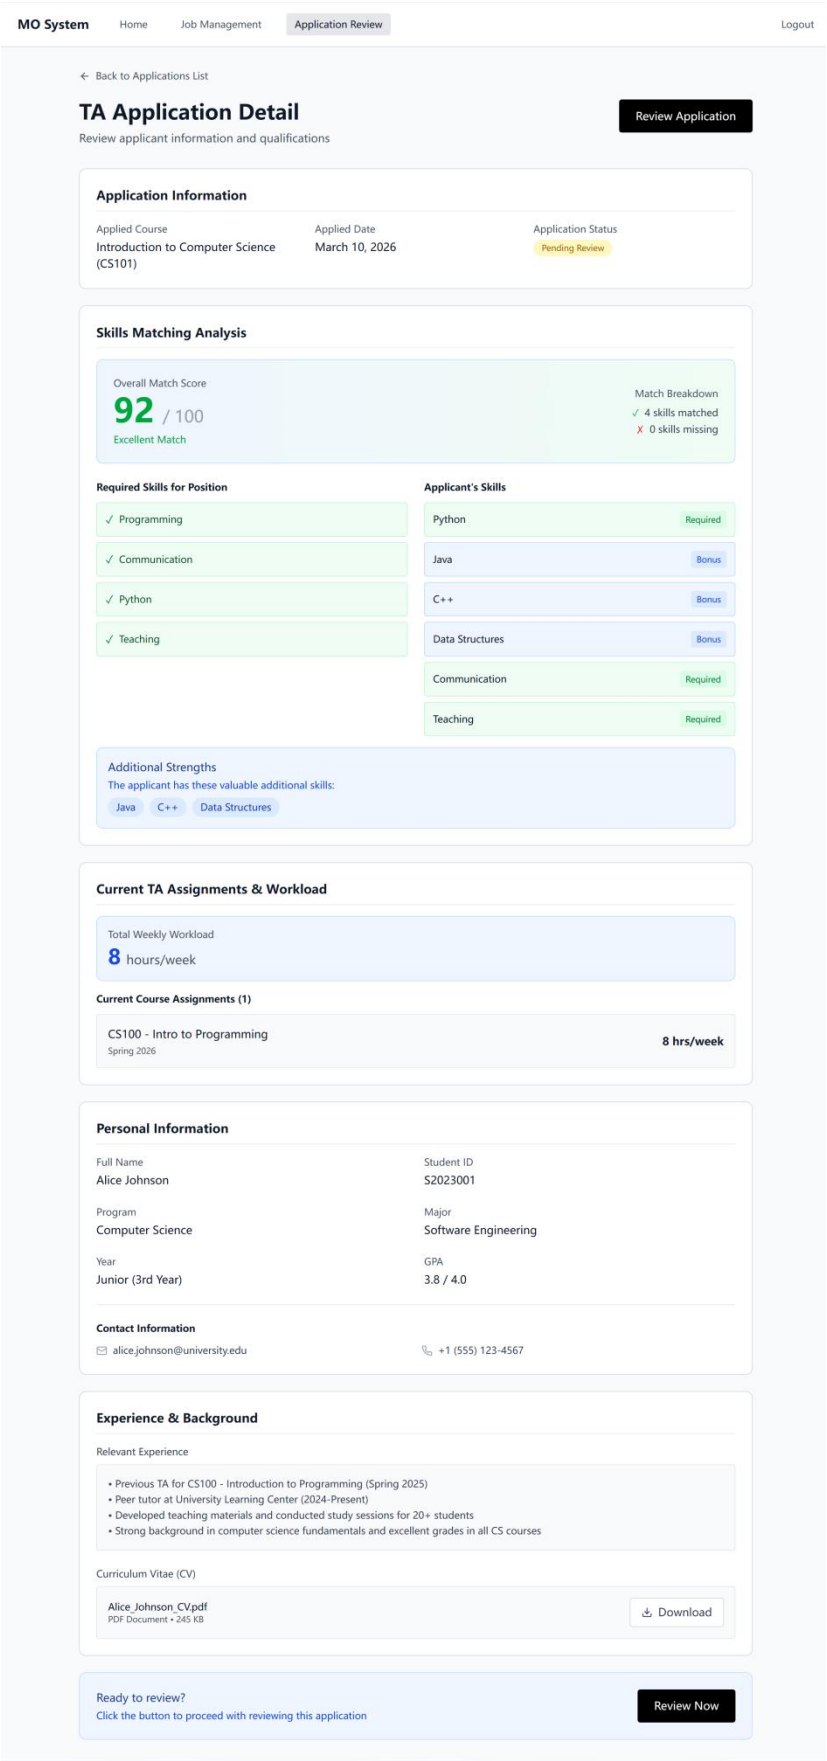
• Current Workload: Shows weekly workload hours per applicant (avoiding scheduling conflicts with other modules), where 0 hours indicate "No assignments" (gray), 1-14 hours represent normal workload, and ≥15 hours display an orange warning icon with workload alerts for high-risk scenarios. Below workload shows assigned course count;

• Status: Pending review / Approved / Rejected;

• Quick action buttons include: View application details, Quick approve (✓), Quick reject (✗), and Full application review.

（4） In the lower right corner of this page, you can click "View My Review Records→" to directly view historical review records and statistics.

3. TA Application Detail



On the Application List page, click "View Application Details" to access the page, which includes viewing applicant information and skill matching analysis.

（1） Application Information: Displays the applied course, application date, and current status (Pending Review / Approved / Rejected).

（2）Skills Matching Analysis:

• Overall match score (out of 100) and match evaluation;

• Position required skills ***VS*** applicant skills comparison: The left side displays the required skills for the position (green ✓= matched, red ✗= missing), while the right side shows the applicant's skills (green = required, blue = additional);

• Red warning box: Highlights missing skills. Blue prompt box: Displays the applicant's additional skill advantages.

（3）Current TA Assignments & Workload: Display the courses the applicant has completed and their weekly working hours to help determine if they are overloaded or if students have been hired by other modules.

• Total Weekly Workload: Displays total workload in large size, using different colors (gray/blue/orange) based on workload levels;

• Current Course Assignments: Shows all assigned courses for students in detail, including course name, semester, and weekly workload;

• Workload Conflict Warning: Displays an orange warning box when total workload reaches or exceeds 15 hours, indicating potential scheduling conflicts and performance impacts;

•Empty Status Prompt: Shows a friendly message if no courses are currently assigned to the student.

（4） Personal Information: Displays basic information such as name, student ID, major, GPA, and contact details.

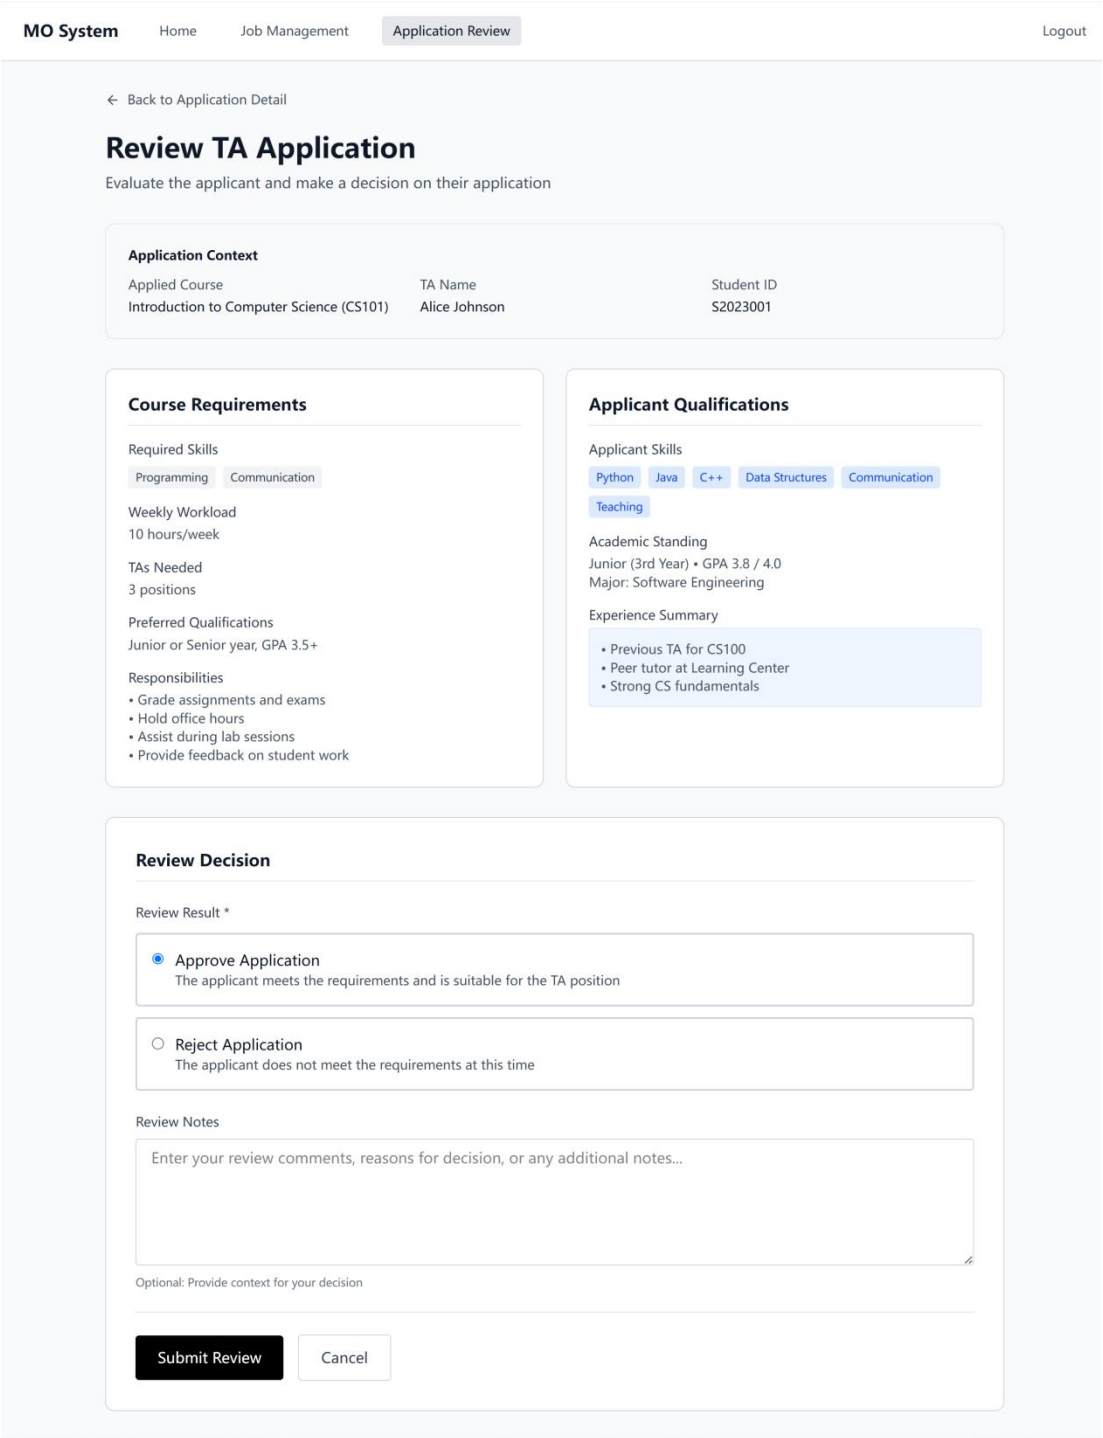
（5）Experience & Background:

• Description of relevant teaching/teaching assistant experience;

• CV file download portal.

Meanwhile, click "Review Application" in the upper right corner of the page or "Review Now" at the bottom to access the review page.

4. Review TA Application



On the "TA Application Details" page, click "Review Application" in the top-right corner or "Review Now" at the bottom to access the review page. This page allows you to complete the application review and record decisions.

（1）Application Context: displays the requested course, TA name, and student ID.

（2）Course Requirements ***VS*** Applicant Qualifications:

• Left side —— Course Requirements: Skills required for the course, weekly workload, number of teaching assistants (TAs) needed, preferred qualifications, and job responsibilities;

•Right side —— Applicant qualifications: Applicant's skills, academic standing, and experience summary.

（3）Review Decision:

• Select "Approve Application" or "Reject Application";

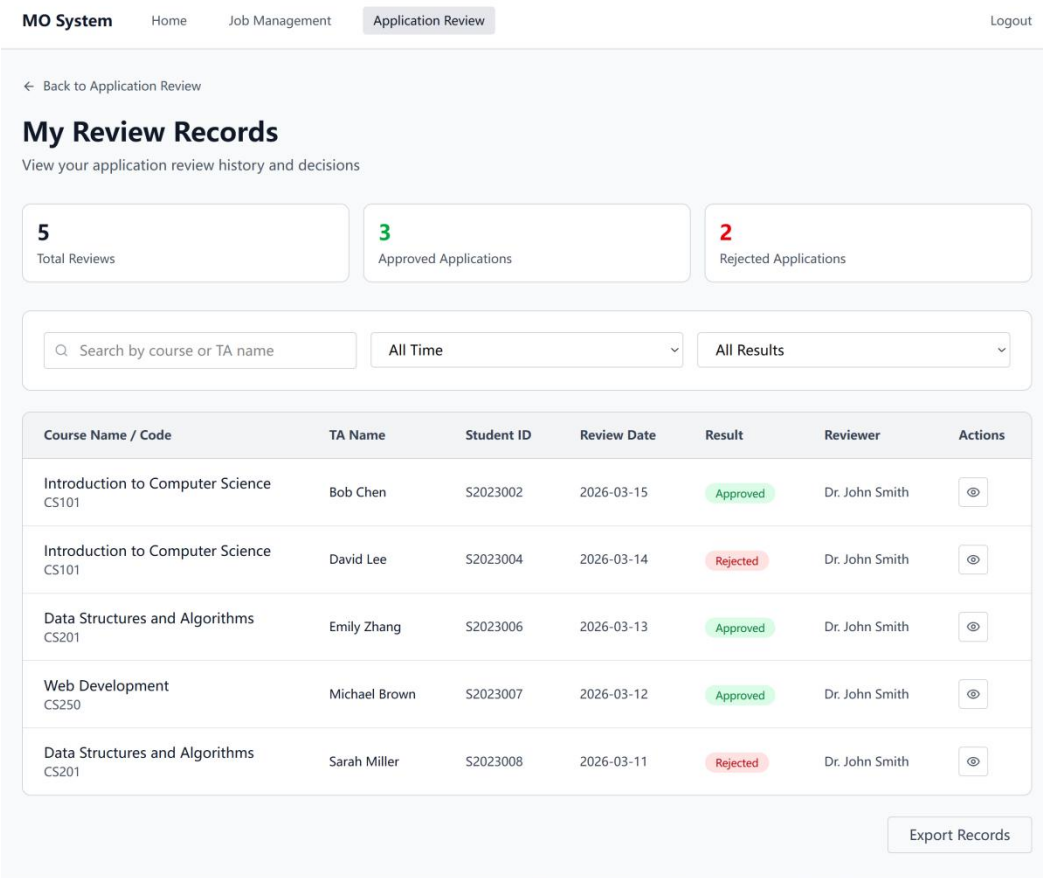
• Enter the review reason or notes in "Review Notes".

（4）Submit Operation:

• Click "Submit Review" to complete the review and update the status;

• Click "Cancel" to abandon the current operation and return to the previous page.

5. My Review Records



Click "View My Review Records" in the lower right corner of the TA Applications

page to access the review records page, where you can view historical review records and statistics.

（1）Data statistics: displays the total number of reviews, approved numbers, and rejected numbers.

（2）Filtering and Search: Search by course/TA name, time range, or review status.

（3）Record list: displays Course Name/Code, TA Name, Student ID, Review Date, Result, and Reviewer.

（4）Operation: Click "View Application Details" to view the audit details of a single record.

（5）Export function: Click "Export Records" in the lower right corner of the page to export all audit records as files.
