Dr. Sarah Johnson

Job Description

We are seeking a motivated and knowledgeable Teaching Assistant for Introduction to Programming course. This position involves helping students understand fundamental programming concepts, assisting during lab sessions, and supporting the instructor with grading assignments.

Responsibilities

- Lead two weekly lab sessions for groups of 20-25 students
- Hold office hours (2 hours per week) to assist students with coursework
- Grade assignments, quizzes, and provide constructive feedback
- Answer student questions via online forum
- Assist instructor with course material preparation

Requirements

- Currently enrolled as a graduate student or senior undergraduate
- Completed CS 101 with a grade of A- or better
- Strong understanding of Python programming
- Excellent communication and interpersonal skills
- Previous teaching or tutoring experience preferred

Preferred Skills

Python | Data Structures | Algorithm Analysis | Git/GitHub | Teaching Experience
